It is the spring of 2021 and you just received some sobering news. Your parents/guardians announced to you that you will be on your own after you graduate from high school. Up until now your parents/guardians have cared for you, meeting all of your basic needs, but today they announced that you will be financially cut off and forced to move out of the house. As a high school graduate, you must decide how you will take care of yourself outside of your parents'/guardians’ care. You must answer this important question…what will you do when you graduate from high school?

You need to answer the following questions:
- How will you earn a living? **MUST BE SCHOOL APPROPRIATE**
- Will this job support you long term or do you need to seek further education and training first?
- Does this job require a specific certification? How will you go about getting that certification?
- If you plan to go to college or trade school, where will you go? How much will it cost?
- Why did you choose this school or program?
- How will you pay for these next steps? (You are responsible for all costs!)
- Where will you live? (since you are no longer living with your parents)
- What will you do in your free time to keep your sanity? Is this hobby affordable?

Requirements:
- Must be written in Spanish
- Must use the future tense along with the present tense.
- Show evidence that you have researched and thoroughly thought about what you want to do by listing all of your resources (for example: a college/university website, company website, etc.)
- Minimum of 1 page.
